SOFTWARE ENGINEER

Leveraging creative analytics and problem-solving skills as a FullStack Software Engineer gifted at translating basic client requirements into technical development plans. Motivated to advance and expand my skill set through targeted mentorship and large scale projects. Experienced in Ruby on Rails, JavaScript, Tailwind CSS, and Bootstrap programming.

WHO IS MAURICE

Through my experiences as a Professional Dancer, Model, and Artistic Director I have acquired strong skills in team-leading and project management. Looking to combine my creative artistry with the ever-evolving world of technology.

-

TECHNICAL PROJECTS

Black Everything

[Test drive](#)

It is a black owned community based web tool(search engine) that gathers(aggregates) information, Selects(curates) multimedia from different sources and centralizes black content all at your fingertips. BlackEverything.com is the destination spot for all things Black,Past, Present, and Future all in one place. There is no need to search for "Black" anything, all your search results will come back Black Everything.

Death to Dad Jokes

[Github](#) / [Demo](#)

A JavaScript web app that allows users to love/hate some of the chring-iest jokes ever written. Utilized ReactJS to fetch from an existing API of dad jokes. The jokes are then displayed one at a time, with the option to reveal the punchline by pressing an additional button.

- Implemented a "tally marks" system to count liked vs disliked jokes. Marks are grouped by 5 dynamically.
-
